PECS

*An Introduction to the Picture Exchange  
Communication System*

# What are PECS?

---

Picture Exchange Communication System

---

Low tech augmented alternative communication device (AAC).

---

Uses pictures and symbols to represent items/activities the learner may request

---

Uses a physical exchange of the card for the item (speaker and audience)

# Why use PECS?

The Picture Exchange Communication System (PECS) is recognized as an evidence-based procedure for individuals with autism ages 2- 12.

Implementation of PECS has demonstrated:

increased communication  
and social interaction,

Decreased range of  
problem behavior

Increased vocal output

Increased variety of  
mands.

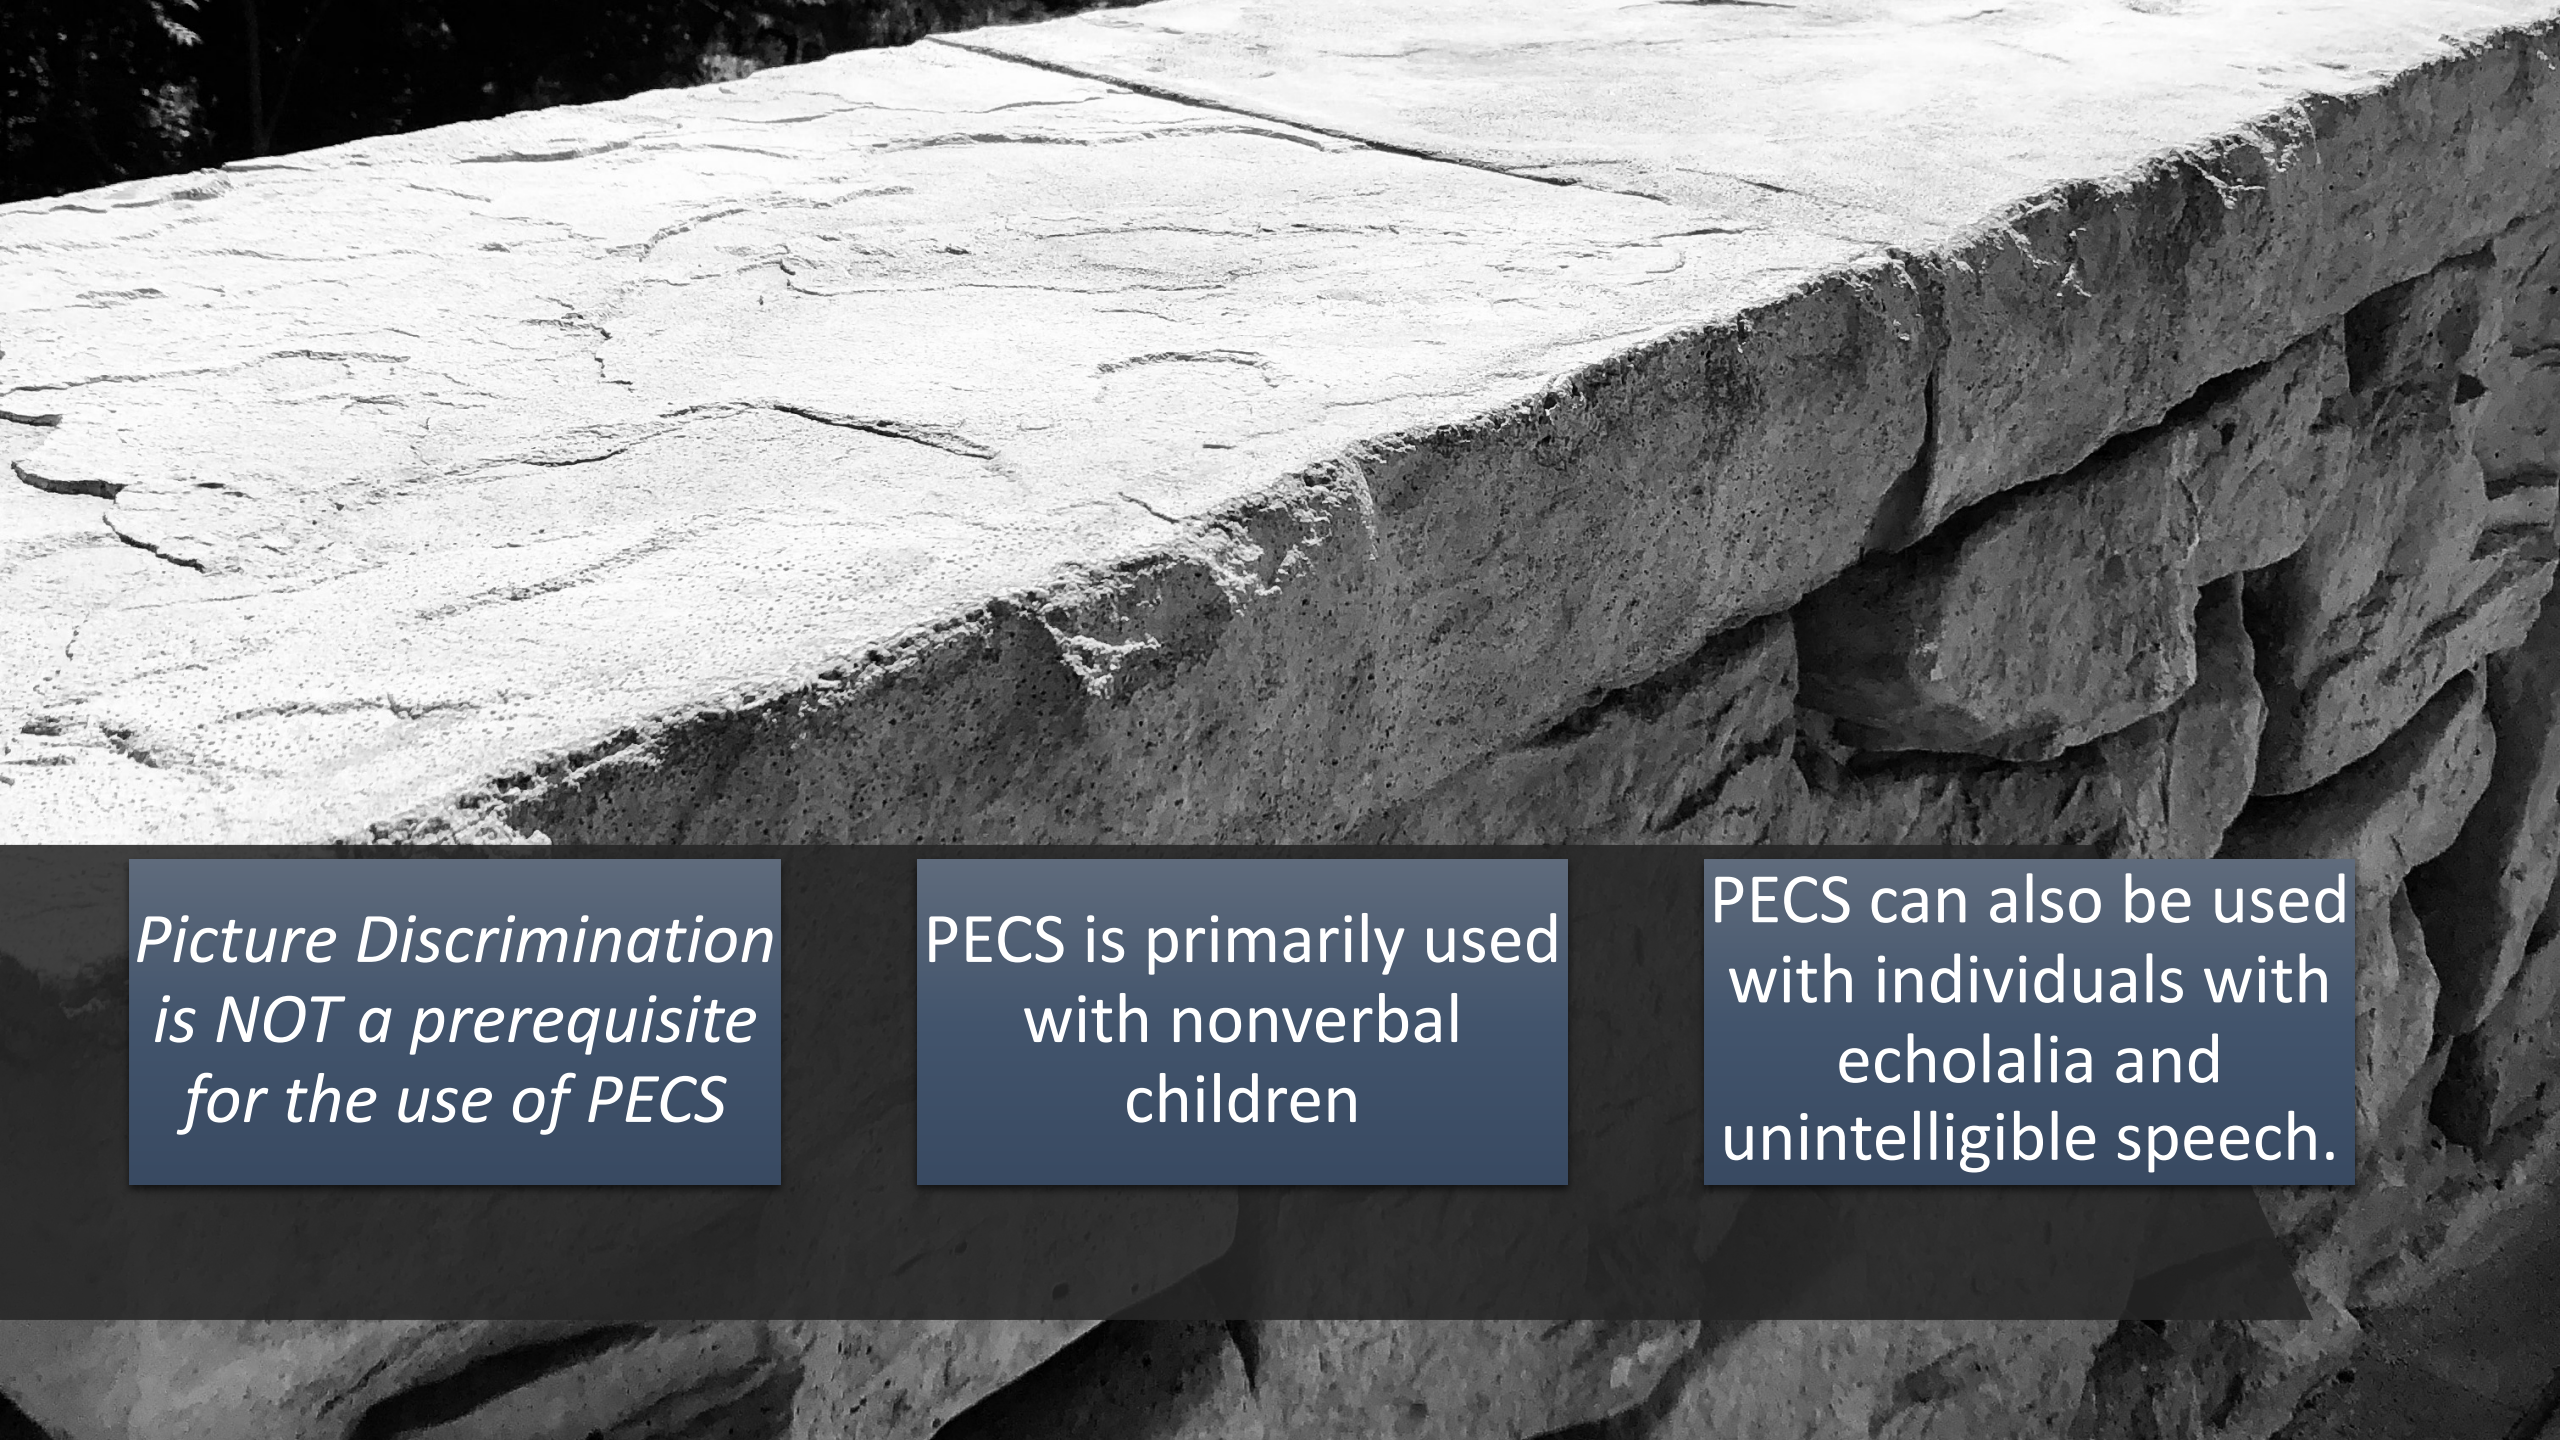

# Prerequisites for using PECS

Individual must have preferred items/activities

Intentional Communicator: *learner is aware of the need to communicate in some way to obtain what they want.*

*Picture Discrimination  
is NOT a prerequisite  
for the use of PECS*

PECS is primarily used  
with nonverbal  
children

PECS can also be used  
with individuals with  
echolalia and  
unintelligible speech.

Teaching a learner PECS is a methodical practice with six, sequential phases of teaching. If you are not familiar with the learner, it is recommended that you conduct a preference assessment before beginning phase 1.

- *Even with learners you are familiar with, it is best practice to do preference assessments often to the point where you are continually doing an informal preference assessment by offering choices and observing the learner throughout each session.*

# Benefits of PECS

- If vocal speech is not developing,
  - You could use sign language but it “requires the individual to be able to attend to and imitate, as well as discriminate, very fine motor movements”

A black and white photograph of a sailboat's deck and rigging. The image shows various ropes, pulleys, and the hull of the boat. In the foreground, there are numbered markers (2, 3, 4, 5) and a label that reads "STARBOARD" and "HARKEN High Performance". A dark rectangular overlay is centered in the image, containing the text "Teaching PECS" in white.

# Teaching PECS

1

Phase 1

# Teaching the exchange

Phase 1 teaches the physical exchange and how to communicate.

It teaches the learner the basic exchange of communication

Involves a speaker and an audience

Entice with  
highly  
preferred  
item

- The item should be out of reach
- The environment should be sanitized and competing preferred items removed.

Entice with  
highly  
preferred  
item

---

One PECS card representing  
item available to learner

---

One extra adult to prompt  
the transfer of the one PECS  
card and then the learner  
receives item.

Phase 2

# Distance and Persistence

- Still one PECS card and one highly preferred item/activity
- Position yourself so the learner must move to hand you the PECS card and receive the preferred item/activity.
- You can also make the learner move a short distance to obtain the PECS card before handing it to you.

# Phase 3

# Picture Discrimination

---

- Add one PECS card to the array.
- Now there are two PECS cards and the learner must discriminate to get the highly preferred item.

Car

Ball

Cheerios

Music toy

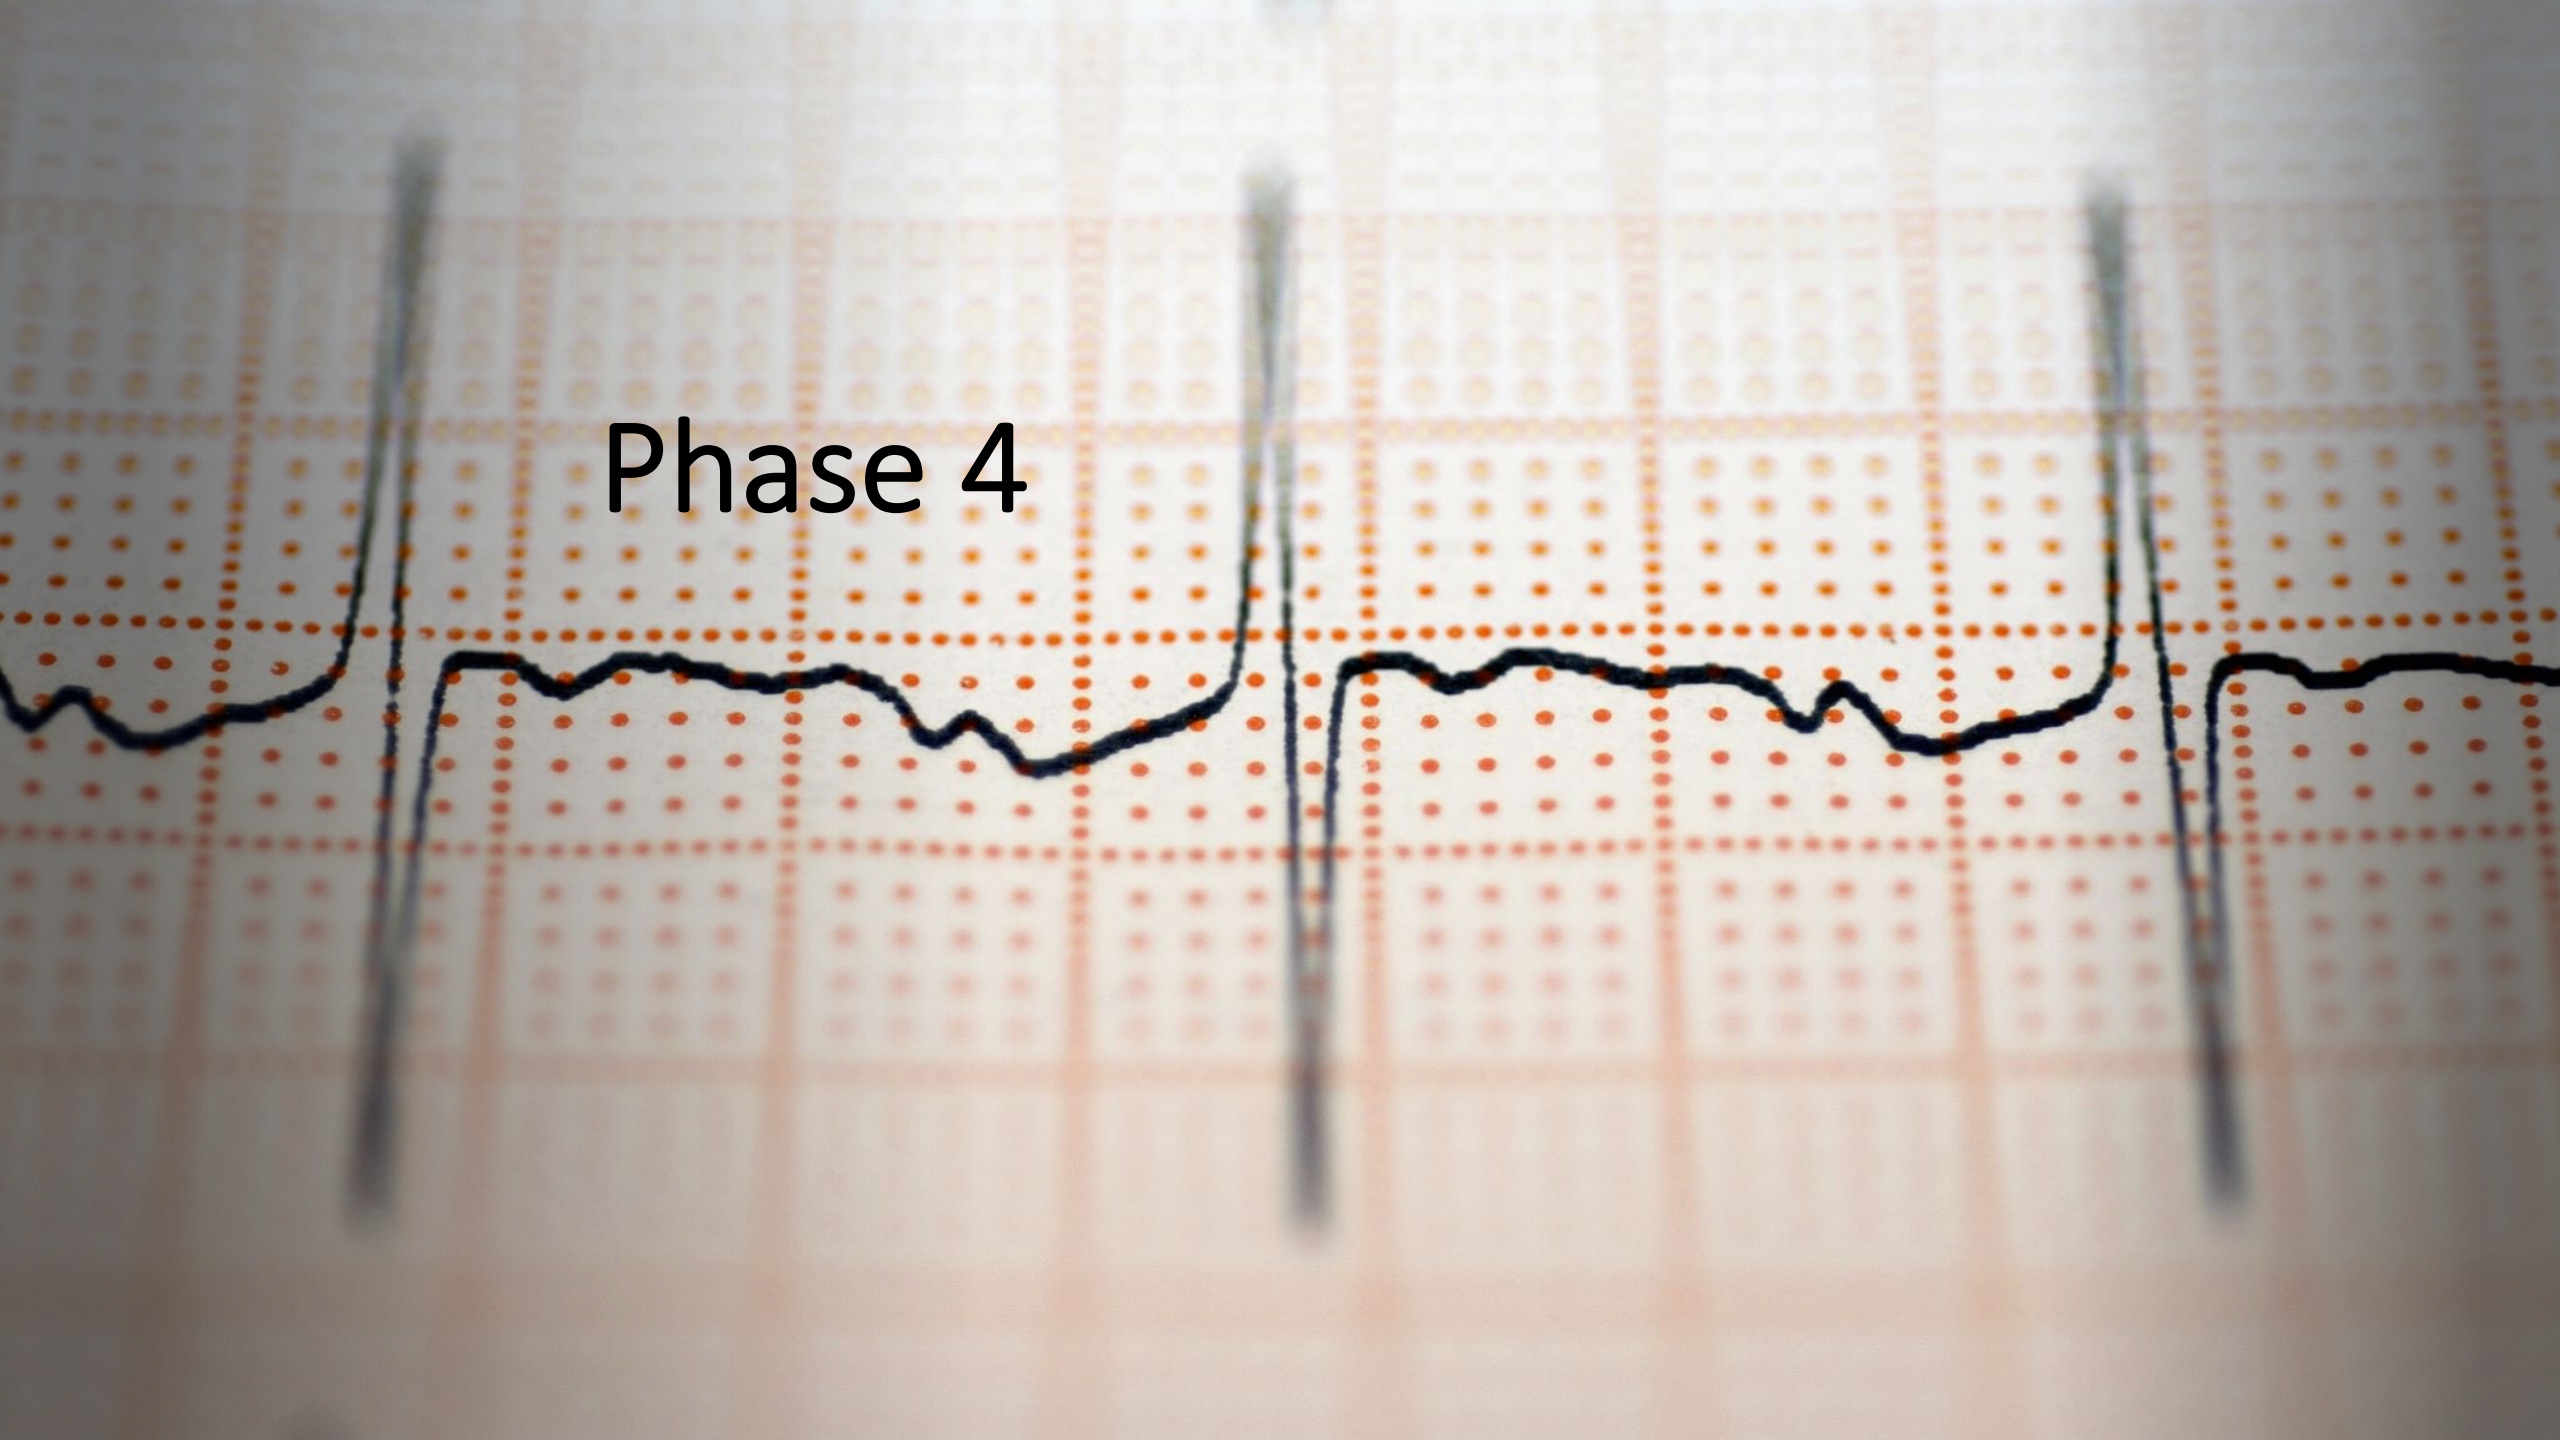

Popper Tube

Phase 4

# Sentence Structure

Introduces the carrier phrases “I want”, “I see”

Enables the learner to tact and begin intraverbal training.

The background is a dark blue field filled with various-sized, semi-transparent numbers (0-9) in a light blue-grey color. A white rectangular frame is centered on the page, containing the text "Phase 5".

Phase 5

# Answering Questions

Answering questions is intraverbal behavior.

Phase 6

# Commenting

Phase 6 goes into more advanced verbal behavior

At this point, the BCBA should look at “high tech” AAC devices and assess the possibility of vocal speech or sign language.

PECS are limited in portability  
(going to the gas station with  
3 binders of PECS)

Better options available for  
advanced language

# Other Benefits of PECS

Teaches the communicative exchange

Reinforces the dynamic of a speaker and listener

Ability for learner to express wants/needs

Can expedite development of vocal speech

# Research on PECS

- There are over 190 published studies showing the efficacy of PECS
- Some noteworthy articles are cited below.
